

Utilize software from this semester to complete the following tasks.

1. Choose a planet (besides Earth) and type a paragraph of 6 sentences about the planet in a Word Processing software
2. Create a line chart showing the monthly average distance from the sun or monthly average temperatures using Spreadsheet software
3. Add two objects to an image of your planet in Photoshop
4. Create an animation of your planet orbiting the sun in Animate
5. Create a one-page flyer in Illustrator or a Web page about your planet in Dreamweaver
